

COMPACT

The CIDAN cut to length line model **COMPACT** is a fully automatic line and is supplied in a very compact construction for coil widths 1250 mm (49"). No other manufacturer can beat the quality and accuracy of the cut and slit pieces in a line of this size. With this line, the productivity can be drastically increased by programming different lengths and pieces optimizing the use of material and minimizing scrap.

The **COMPACT** has a straightening unit with 5 rolls and the cut to length is done by a motorized mechanical shear.

The LineLink control system with a color touch screen gives you the possibility to store many programs as well as a library of coils. LineLink is available in many different languages.

The **COMPACT** is prepared for, and can be fitted with a slitting unit and multiple slitting knives.

The **COMPACT** will handle pre-painted sheets and other sensitive materials.

The **COMPACT** offers infeed, straightening, slitting and shearing in a compact size.

Digital indicators ensures precise adjustments time after time.

STANDARD

5 straightening rolls, 2 infeed rolls, chain drive

| Model | Cutting width mm (") | Capacity | | | Speed m/min ft/min | Outer dimensions Length x Width x Height mm (") | Motor kW (hp) shear + feeding | Weight kg (lbs) Approx. |
